Covid 19 status- Analytical Note

- COVID infection prevention by following Covid appropriate behaviour got strengthened with
 introduction of COVID vaccination. Fast vaccination is very useful to safeguard people. Among
 all people the first priority is elderly people followed by people with comorbidities and others.
 COVID-19 vaccines protect people from getting infected and become severely ill, and
 significantly reduce the likelihood of hospitalization and death.
- 77.16% of the eligible population vaccinated with a single dose of vaccine till September 8-(2,21,45,091)
- Total number of Keralites vaccinated with double dose till September 8- 84,58,164 (29.47%)
- Kerala is the state with highest rate of; Vaccination/Million-852521
- The state has vaccinated more than 93% of people aged more than 45 years with a single dose and 49% with double dose.
- The above data indicates that people have been cooperating. We appeal to the 2nd dose eligible people to take their second dose of Covishield/ Covaxin without delay. Both the vaccines are effective.
- The state completed 11,17,883 tests in the previous week with a weekly TPR of 17.48%. There is a 4.5% reduction in the weekly growth of new Covid 19 cases and 6% reduction in the weekly growth rate of TPR during the first week of September compared to previous week
- For any disease control program, active case finding is important. The state is doing appropriate testing. However, there is an apprehension regarding test positivity rate. It is hereby explained that test positivity rate indicates the infection. There are two specific issues all may understand i.e. contracting infection and because of contracting infection the disease is manifested. The World over post vaccination phase, this is examined as CONVERSION RATE to decide the severity of pandemic.
- Out of total 2,39,480 cases of infection only 13 % of the active cases are admitted either in hospital/Field hospitals. This percentage is more or less constant and that indicates that the progression toward disease of the person who is infected is not very alarming and appropriate care and support is being given to patients. The patients who arrive late in the hospital even though having morbidity are the majority patients in the hospitals. Therefore, we request all people once detected with covid infection, if having comorbidities, they should get hospitalized in time.
- The data as on date suggests the conversion rate is stable because the People are following instructions, taking vaccines. However, it can be further improved with one singular cooperation from all i.e. positive person having comorbidities should not delay the arrival in Hospital and take treatment as per the treatment protocols.
