The daily COVID-19 bulletin of the Department of Health and Family Welfare, Government of Kerala summarizes the COVID-19 situation in Kerala. The bulletin also contains links to various important documents, guidelines, and websites for references.

Covid 19 status- Analytical Note

- COVID infection prevention by following Covid appropriate behaviour got strengthened with introduction of COVID vaccination. Fast vaccination is very useful to safeguard people. Among all people the first priority is elderly people followed by people with comorbidities and others. COVID-19 vaccines protect people from getting infected and become severely ill, and significantly reduce the likelihood of hospitalization and death.
- 77.3% of the eligible population vaccinated with a single dose of vaccine till September 9- (2,22,07,507)
- Total number of Keralites vaccinated with double dose till September 9- 85,11,018 (29.47%)
- Kerala is the state with highest rate of; Vaccination/ Million- 860476
- The state has vaccinated more than 93% of people aged more than 45 years with a single dose and 50% with double dose.
- The above data indicates that people have been cooperating. We appeal to the 2nd dose eligible people to take their second dose of Covishield/ Covaxin without delay. Both the vaccines are effective.
- For any disease control program, active case finding is important. The state is doing appropriate testing. However, there is an apprehension regarding test positivity rate. It is hereby explained that test positivity rate indicates the infection. There are two specific issues all may understand i.e. contracting infection and because of contracting infection the disease is manifested. The World over post vaccination phase, this is examined as CONVERSION RATE to decide the severity of pandemic.
- Out of total 2,36,345 cases of infection only 13% of the active cases are admitted either in hospital/Field hospitals. This percentage is more or less constant and that indicates that the progression toward disease of the person who is infected is not very alarming and appropriate care and support is being given to patients. The patients who arrive late in the hospital even though having morbidity are the majority patients in the hospitals. Therefore, we request all people once detected with covid infection , if having comorbidities, they should get hospitalized in time.
- The data as on date suggests the conversion rate is stable because the People are following instructions, taking vaccines. However, it can be further improved with one singular cooperation from all i.e. positive person having comorbidities should not delay the arrival in Hospital and take treatment as per the treatment protocols.
